CURRICULUM VITAE

I was born on 21.04.1964. in Split. I finished my elementary and high school education in my home town of Split where, in 1989., I graduated from Medical School and became a doctor of medicine.

I did my internship at the Croatian National Institute of Public Health in Split and I took my licensing exam in Zagreb.

As a doctor of family medicine, I worked in many pediatric and offices of family medicine around Split therefore I have plenty of valuable experience in those areas of expertise. I opened my own office in 2000. at the address Dubrovačka 65, Split where I've continued to work to this very day. My office has over 1800 registered patients many of whom are of younger age and are engaged in various sport activities so I'm well acquainted with the role and importance of medicine in a young athlete's life.

I've also participated in many studies which were conducted at multiple Congresses of Family Medicine and I was also a part of the professional aspect of the Congress of Diabetics. For my active partaking as a doctor of medicine within the Diabetics Association, I was presented with an award. I have also participated in several clinical and epidemiologic studies.

My husband, Merim Bezdrov, is a doctor of family medicine with his own office, like me. We are proud parents of two sons, Dino and Leo.
